Cloud and IT Support Engineer with 5+ years supporting federal government, enterprise, and aerospace environments. Deep expertise in AWS · Azure · GCP, endpoint management (Intune, Jamf), Zero Trust architecture, FedRAMP IL4/IL5 compliance, and ServiceNow ITSM. Currently studying Applied Machine Learning at University of Washington.

EXPERIENCE

System Development Engineer — Dec 2024 – Feb 2025

Amazon Leo / Kuiper · Contract

- Deployed **5 EGSE satellite test racks** (Linux ATE + Windows KTE) to **100% readiness** for mission-critical **$10M+ Kuiper** constellation program; hardware install, config, and aerospace-grade integration across multiphase rollout
- Authored **5+ cross-functional deployment procedures** in Confluence/Quip – cut engineer onboarding **40%** across 3 disciplines and 8 phases; 12 compliance checklists across 10+ protocols; **zero critical audit findings**
- Collaborated with firmware, RF, and systems engineering teams to validate EGSE hardware against constellation program specs; test documentation adopted as **program-wide standard** across all ATE/KTE platforms

IT Systems & Security Analyst — Dec 2023 – Jul 2024

ServiceNow (Cognizant) · Contract

- Delivered **FedRAMP IL4/IL5** technical support for **500+ federal users** across 12+ agencies; managed YubiKey (ADM/NSC/GCC), VDI (SNCA/v2/v3), AD provisioning, and MFA/PAM under **NIST 800-171**
- Resolved **900+ escalations at 98.3% SLA**; automated **60% of routine workflows** cutting response time 45%; mentored 8 junior staff reducing escalated tickets **42%**
- Built Python-based triage scripts to pre-classify and route incoming federal tickets; **eliminated manual misrouting** across 12+ agencies and contributed to reusable tooling adopted by the broader support team

Cloud Capacity Engineer — Jul – Oct 2024

ServiceNow (HCL America) · Contract

- Managed **1,000+ production servers** across 34 global PODs; recovered **$2M+ in unused hardware assets** through systematic lifecycle management; maintained **99.9% service continuity**
- Delivered 90+ daily capacity reports across US, Ireland, and Australia shifts; resolved 20+ weekly incidents (avg 5.5 hrs); contributed to RHEL8 upgrade across **800+ servers**
- Developed PowerShell/Bash health-check scripts to automate server state validation across 34 PODs; reduced manual audit time **~70%** and surfaced 15+ decommission candidates missed by prior inventory cycles

Systems Support Technician — May 2021 – Apr 2024

United Parcel Service (UPS) · Full-Time

- Regional IT support across Northwest hubs (WA/OR/ID/MT/AK): Zebra printers (ZT410/411/ZD621), Honeywell/Zebra scanners, SICK-EDS laser systems, MSC/LMS – **98% resolution, zero major incidents at peak**
- Supported Wi-Fi expansion, VoIP migration (Redmond & Seattle), and RFID mis-load reduction; streamlined ServiceNow routing improving SLA compliance across 5+ hubs
- Implemented proactive hardware maintenance cycles across 5+ hubs; identified and resolved **50+ latent device failures** ahead of peak season, avoiding an estimated **$180K** in emergency repair and downtime costs

IT Support Consultant — Apr 2020 – Present

Freelance / Self-Employed

- **95% first-session resolution** across 200+ clients; zero security breaches over 12 months for 60+ systems; 180+ security audits; **4.8/5 client satisfaction · $85K annual revenue**
- Developed and open-sourced a reusable **Python automation toolkit** (Scripts-Toolkit) covering endpoint hardening, audit reporting, and onboarding workflows; adopted by 3 SMB clients into permanent IT operations

Network Field Engineer — Jun 2017 – May 2019

Charter Communications (Spectrum)

- **95% first-attempt resolution** across 300+ monthly network issues; **$240K in service upgrades**; 1,800+ installations; mentored 8+ junior engineers across 25+ service territories
- Standardized field diagnostics protocol across 25+ territories; **reduced repeat service calls 28%** and drove upgrade conversions through proactive infrastructure gap assessment during customer visits
