Redmond, WA • U.S. Citizen

SKILLS

Cloud Platforms

- AWS • Azure • GCP
- Hybrid Cloud Architecture
- Microsoft 365

Automation & IaC

- Terraform (LinkedIn Learning)
- Python • PowerShell
- Bash • CI/CD Pipelines

Security & Compliance

- Zero Trust / FedRAMP
- IL4/IL5 • NIST • SIEM
- MFA • PAM • VPN

Systems & Platforms

- Linux / Ubuntu / Windows
- Intune • Jamf • AD
- VMware • Kubernetes

CERTIFICATIONS

- AWS Cloud Practitioner (Badge)
- AWS Solutions Architect (Badge)
- Azure Fundamentals (AZ-900)
- GCP Enterprise Essentials
- Terraform (LinkedIn Learning)
- ITIL 4 Foundation (LinkedIn)
- CompTIA Security+ (In Progress)
- CompTIA A+
- M365 Administration

EDUCATION

Machine Learning Certificate

(Graduated)
Washington University, Seattle
Sep 2025 – Jun 2026
Focus: Supervised Learning,
Deep Learning, NLP, MLOps,
LLMs & Generative AI

Cloud Architecture & Services

Bellevue College, Bellevue, WA
Incl. Networking II — Netacad

M.S. Software Engineering

IUST, Tehran, Iran

B.S. Computer Science

Arak University of Technology, Iran

Note:

Cloud Architecture & Services at
Bellevue College; demonstrates end-
to-end AWS Solutions Architect
design principles

PROFESSIONAL SUMMARY

Cloud Infrastructure and Security Engineer with 8+ years delivering secure, scalable, highly available systems across AWS, Azure, and GCP in the U.S., plus 25+ years global IT experience (details on LinkedIn). Led initiatives improving infrastructure utilization 32%, recovering \$2M in unused assets, and maintaining 99.8% uptime for federal IL4/IL5 and enterprise production environments. Expert in Zero Trust architecture, IaC, and hybrid cloud operations serving 10,000+ users across aerospace, federal, and enterprise sectors.

KEY ACHIEVEMENTS

- Recovered \$2M+ in unused assets **while optimizing 1,000+ servers across hybrid cloud environments**
- Reduced deployment time 40% **through automation and standardized IaC workflows**
- Increased provisioning speed 45% **using Intune, Jamf, and automated endpoint workflows**
- Improved capacity planning 32% **preventing infrastructure overruns across 34 production PODs**
- Sustained 99.8% uptime **for federal IL4/IL5 and enterprise environments serving 10,000+ users**

PROFESSIONAL EXPERIENCE

IT Support Consultant | Freelance / Self-Employed

Apr 2020 – Present • *Freelance*

- 95% first-session resolution rate across 200+ clients; **zero security breaches over 12 months for 60+ managed systems**
- 180+ security audits completed; **4.8/5 client satisfaction rating • \$85K annual revenue**

System Deployment Engineer | Amazon Leo (Project Kuiper)

Dec 2024 – Feb 2025 • *Contract*

- Deployed and validated EGSE/KTE satellite test infrastructure **supporting Project Kuiper launch readiness**
- Automated deployment validation workflows, **reducing manual verification cycles across test environments**
- Maintained rigorous configuration control and documentation **for aerospace-grade systems**

Cloud Capacity & Infrastructure Engineer | ServiceNow

Jul 2024 – Oct 2024 • *Full-time*

- Recovered \$2M+ in unused cloud assets **by auditing and right-sizing 1,000+ servers across 34 production PODs**
- Improved capacity planning accuracy 32%, **preventing infrastructure overruns in global hybrid environments**
- Built automated capacity dashboards **enabling proactive resource forecasting across AWS, Azure, and GCP**

IT Systems & Security Analyst | ServiceNow

Dec 2023 – Jun 2024 • *Full-time*

- Supported IL4/IL5 FedRAMP secure environments **for 500+ federal users ensuring full compliance**
- Accelerated device provisioning 45% **using Intune, Jamf, and automated onboarding workflows**
- Implemented Zero Trust controls **aligned to FedRAMP: MFA, PAM, VPN, and endpoint compliance**

Systems & Infrastructure Technician | UPS (United Parcel Service)

May 2021 – Dec 2023 • *Full-time*

- Modernized Wi-Fi and VoIP infrastructure across 10 sites, **improving reliability for 10,000+ users**
- Led 15+ IT infrastructure projects, **negotiating vendor contracts saving \$800K annually**
- Authored 15+ IT governance policies **enforcing compliance and security standards enterprise-wide**

Network Field Engineer | Charter Communications (Spectrum)

Jun 2017 – May 2019 • *Full-time*

- Installed and maintained fiber, coaxial, and enterprise network infrastructure **across customer sites**
- Diagnosed and resolved complex network outages, **improving regional uptime metrics**

TECHNICAL PROJECT

Real-Time Live Captioning Pipeline (AWS Transcribe • S3 • Lambda • API Gateway)

Serverless real-time transcription pipeline using AWS Transcribe Streaming, Lambda, API Gateway Web Sockets, and S3 — achieving sub-second caption latency with event-driven architecture.
